

JOHNSEN BERDIN

Cordova, Cebu, Philippines | +63 926 082 6406 | johnsenberdin2930@gmail.com | GitHub | johnsenb.dev | LinkedIn

SUMMARY

Full-stack web developer with hands-on experience building production-grade applications using Next.js, TypeScript, and PostgreSQL. Skilled in authentication, background jobs, cloud storage, payment integrations, and REST API design. Fast learner who ships complete features end-to-end.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES6+)

Frameworks: Next.js 16 (App Router), React 19, Node.js, Vite

Databases & ORMs: PostgreSQL, Prisma, Drizzle ORM, Supabase, Neon

State Management: Zustand, React Context

Data Fetching: TanStack Query, Axios

Styling: Tailwind CSS, shadcn/ui, Radix UI

Auth & Security: Better Auth, Clerk, Lucia Auth, Argon2, OAuth (Google, GitHub)

Cloud & DevOps: AWS S3, Vercel, Upstash Redis

Integrations: Stripe (subscriptions, webhooks), Inngest (background jobs), Resend (transactional email)

Tools: Git, GitHub, VS Code, React Router, ESLint, TypeScript strict mode

EXPERIENCE

Manulife — Claims Adjudicator 2022 – Present

Cordova, Cebu, Philippines

- Process and assess insurance claims in accordance with company protocols and compliance standards
- Consistently meet productivity and accuracy targets in a high-volume processing environment
- Resolve client payment and inquiry issues with a focus on accuracy and customer satisfaction

PROJECTS

Modern Portfolio — johnsenb.dev | GitHub

Next.js 16, TypeScript, Tailwind CSS, shadcn/ui, React

- Personal portfolio showcasing full-stack projects with project descriptions, tech stack, live demos, and GitHub links
- Built with modern web technologies and responsive design to highlight professional work and development skills

TicketHub v2 — tickethubv2.johnsenb.dev | GitHub

Next.js 16, TypeScript, Prisma, PostgreSQL (Supabase), Better Auth, AWS S3, Inngest, Resend, Stripe, Tailwind CSS, shadcn/ui

- Built a multi-tenant SaaS ticketing platform with organization management, role-based access control (owner, admin, member), and member invitation flows

- Integrated Stripe subscriptions with webhooks for real-time provisioning — automatically removes excess members and invitations on plan downgrade or cancellation
- Designed a secure REST API with API key authentication (Argon2 hashing), scoped credentials, revocation support, usage audit trail, and IP-based rate limiting via Upstash Redis
- Built ticket-to-ticket reference system using regex to auto-detect ticket URLs in comments and create bidirectional relationships in the database
- Configured AWS S3 file storage with pre-signed URLs, image cropping (react-easy-crop), and support for PDF and image uploads
- Set up Inngest background jobs for transactional emails: email verification, password reset, org invitations, and deprovisioning notifications via Resend

GameHub — gamehub.johnsenb.dev | GitHub

React 19, TypeScript, Vite, TanStack Query, Zustand, Tailwind CSS, React Router, shadcn/ui

- Built a game discovery web app featuring 500k+ games from the RAWG API with advanced filtering, search, and infinite scroll pagination
- Implemented custom React hooks (useGames, useGame, useScreenshots, useTrailer) for efficient data fetching and caching with TanStack Query
- Managed global state with Zustand including game filtering, platform selection, genre filtering, and sort order with devtools debugging
- Built dynamic game details pages with routing parameters, trailers, screenshots, and detailed metadata (platforms, genres, publishers, metacritic scores)
- Implemented responsive grid layouts and dark mode support with proper type organization following domain-driven design principles

Other Projects

Expense Tracker, Online Shop, note-app, ts-lesson — TypeScript, React/Next.js, modern CSS frameworks

EDUCATION

University of Cebu, Lapu-Lapu & Mandaue

BSc Customs Administration

South Western University PHINMA

Accountancy & Business Management — Senior High School

LICENSES

Licensed Customs Broker — Philippines
